## NEW 5-speed Automatic Transmission

**A new 5-speed automatic transmission is utilized resulting in smooth shift. Numerous merits such as improved driving performance, comfort, and fuel efficiency are achieved simultaneously.**

The newly adopted 5-speed automatic transmission is a next generation transmission which borrows freely from the latest technology on the Lexus. The performance of the automatic transmission has been improved as a result of such things as an improved time-lag that is on a world class level and a reduction in the time it takes to shift.

It is not just the power performance of this transmission that has been raised; significant improvements in terms of driver comfort and fuel efficiency have also been realized.
