

## MULTI DISPLAY

### ■ DESCRIPTION

- A Multi display has been provided on the center cluster panel of the European model as an option. The display, which consists of a 7.0-inch wide LCD (Liquid Crystal Display) screen with a IR (Infrared)-sensitive touch panel, offers improved ease of use.
- Through the use of the GPS (Global Positioning System) and map data in a DVD (Digital Versatile Disc), this navigation system analyzes the position of the vehicle and indicates that position on the map that is displayed on the screen.  
Additionally, it provides voice instructions to guide the driver through the route to reach the destination that has been selected.
