Engine Control (LHD)

1: Shielded
2: G. C. C.
3: Europe

The diagram illustrates the wiring for the Engine Control (LHD) system. It shows the connection between the engine and the ECU. The engine section includes the throttle position sensor, water temperature sensor, air flow meter, and six injectors. The ECU section includes the throttle position sensor, water temperature sensor, air flow meter, and six injectors. The ECU is connected to various sensors and actuators through a series of junctions and connectors. The diagram is divided into sections for the engine (top) and the ECU (bottom).
