

SC430

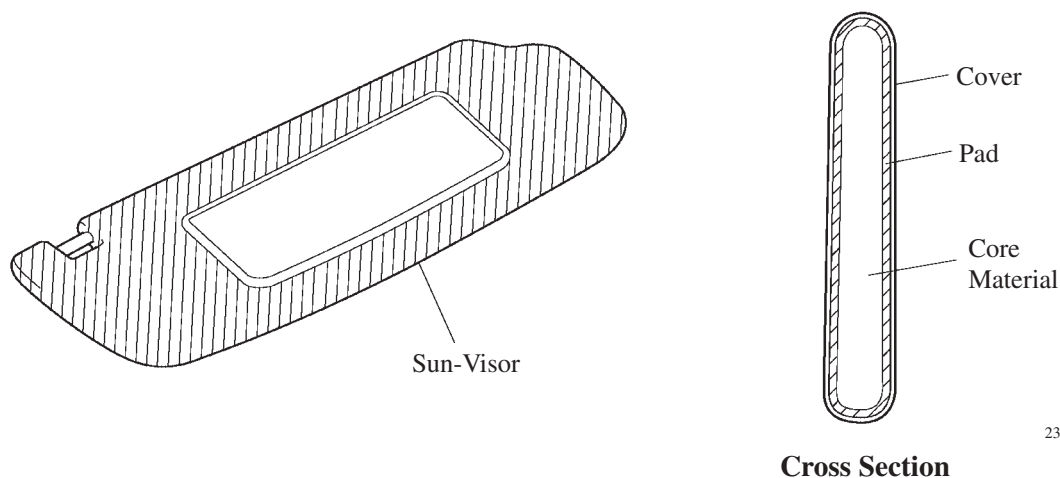

OUTLINE OF NEW FEATURES

The SC430 is a sports coupe model, an ultimate fusion of an open-top and coupe with a retractable hardtop function.

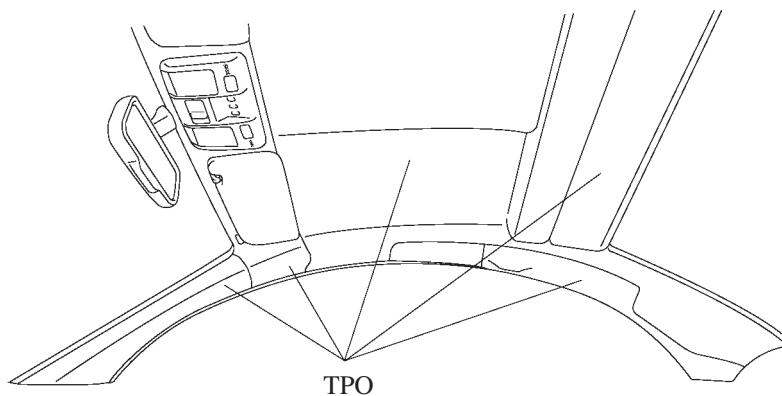

Changes have been made to the following features on the SC430:

1. Interior

- A pad is provided between the core material and the cover of the sun-visor to increase its softness and decrease its overall thickness, thus realizing improved ease of use.

- TPO (Thermoplastic Olefin) has been adopted for the covers of the roof portion and pillar garnish to improve their recyclability.

2. LEXUS Navigation System

A calendar display function has been newly added to the LEXUS navigation system.
