

## GS430/300

### OUTLINE OF NEW FEATURES

The GS430/300 is truly a driver's car of the highest dimension. Its combination of style and function give the car a nimble and solid form and impart a progressive and sophisticated image.

Changes have been made to the following features on the GS430/300:

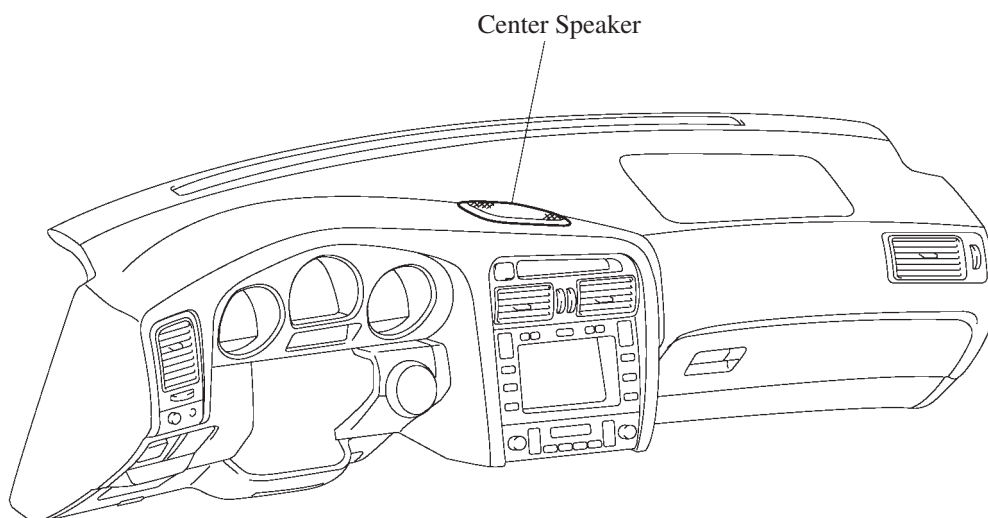

#### 1. Exterior

The following exterior colors have been added:

| New Color No. | New Color Name            |
|---------------|---------------------------|
| 066           | Ivory Pearl Crystal Shine |
| 4P7           | Beige Metallic            |
| 8P9           | Blue Mica Metallic        |

#### 2. Interior

A center speaker has been newly adopted above the instrument panel of the European model with the Mark Levinson premium audio unit.

### 3. Power Window System and Moon Roof

- An “all-door one-touch auto up and down function” has been newly adopted in the power window system of the Australia model as indicated in the table below.
- The operation of the power window system and moon roof on the European model has been changed as indicated in the table below.

○ = Operation      — = No Operation

● = Operation with Jam Protection Function

■ : Change

\*: Operation is permitted approximately 45 seconds after the ignition key is turned to the ACC or LOCK position, or the front doors are opened.

### 4. Combination Meter

A speed warning system, which sounds a buzzer for 6 seconds when the vehicle speed is 120 km/h or above to comply with the regulations, has been adopted on the GS300 for the G.C.C. countries.
