

## ■ SERPENTINE BELT DRIVE SYSTEM

### 1. General

- Accessory components are driven by a serpentine belt consisting of a single V-ribbed belt. It reduces the overall engine length, weight and number of engine parts.
- An automatic tensioner eliminates the need for tension adjustment.

### 2. Automatic Tensioner

The automatic tensioner, which mainly consists of an idler pulley, an arm, a spring case and a torsion spring, maintains the tension of the V-ribbed belt constant through the force of the torsion spring.
