# Comfort

This sedan is further enhanced with an array of equipment amenities.

## Car Navigation <Available only in Europe as option.>

### Equipped with a highly accurate car navigation system which utilizes a hybrid system

This hybrid car navigation system carries out automatic position search by means of GPS satellites and a built-in sensor. This highly accurate navigation function offers the driver multiple function support such as road map directions to an intended location, optimal route search, and estimated time of arrival. Even on roads traveled for the first time, this system promises peace of mind while driving.

## Multi function Keyless entry

A wireless remote control key is employed not only to lock and unlock the doors as you would expect but also to open the windows, roof and trunk. This multi-function key is also linked to a security function as well.
