DI2S5-02

DTC P0120/41 Throttle Position Sensor Circuit Malfunction

CIRCUIT DESCRIPTION

Throttle position sensor is mounted on the throttle body and it have the 2 sensors to detect the throttle opening angle and the malfunction of the throttle position sensor's own.

The voltage applied to the terminals VTA and VTA2 of the engine ECU changes between 0 V and 5 V in proportion to the opening angle of the throttle valve.

The engine ECU judges the current opening angle of the throttle valve from these signals input from terminals VTA and VTA2, and the engine ECU controls the throttle motor to make the throttle valve angle properly in response to driving condition.

If this DTC is stored, the engine ECU shuts down the power for the throttle motor and the electromagnetic clutch, and the throttle valve is fully closed by the return spring.

However, the opening angle of the throttle valve can be controlled by the accelerator pedal through the throttle cable.

DTC No.	DTC Detecting Condition	Trouble Area
P0120/41	Condition (a), (b), (c) or (d) continues for 2.0 seconds: (a) VTA \leq 0.2 V (b) VTA2 \leq 0.5 V (c) VTA \geq 4.8 V (d) When VTA \geq 0.2 V and \leq 2.0 V, and VTA2 \geq 4.97 V (b) VTA-VTA2 \leq 0.02 V	Open or short in throttle position sensor circuit Throttle position sensor Engine ECU
	Condition (a) or (b) continues for 0.4 seconds: (a) VTA \leq 0.2 V and VTA2 \leq 0.5 V	

HINT:

After confirming DTC P0120/41 use the hand-held tester to confirm the throttle valve opening percentage and closed throttle position switch condition.

Accelerator pedal position expressed as percentage and voltage				
Acceleratorpedalreleased		Acceleratorpedaldepressed		Trouble area
THROTTLEPOS	THROTTLEPOS#2	THROTTLEPOS	THROTTLEPOS#2	
0 %	0V	0 %	0 V	VC line open
0 %	2.0~2.9V	0 %	4.6~5.1 V	VTA line open or grand short
8~20%	0 V	64~96%	0 V	VTA2 line open or grandshort
100%	5V	100%	5 V	E2 line open

WIRING DIAGRAM

INSPECTION PROCEDURE

HINT:

- If DTC P0110/24 (Intake Air Temp. Circuit Malfunction), P0115/22 (Water Temp. Circuit Malfunction), P0120/41 (Throttle Position Sensor Circuit Malfunction), P1120/19 (Accelerator Pedal Position Sensor Circuit Malfunction) are output simultaneously, E2 (Sensor Ground) may be open.
- Read freeze frame data using hand-held tester. Because freeze frame records the engine conditions
 when the malfunction is detected, when troubleshooting it is useful for determining whether the vehicle
 was running or stopped, the engine warmed up or not, the air-fuel ratio lean or rich, etc. at the time
 of the malfunction.

When using hand-held tester

1[]

Connect[hand-held[tester,[read[throttle[valve]ppening[percentage.

PREPARATION:

- (a) Connect the hand-held tester to DLC3.
- (b) Turnthe ignition witch ON and witch the hand-held tester main witch ON.

CHECK:

Read[]he[]hrottle[]yalve[]pening[]percentage[]]or[]VTA[]circuit[]and read[]he[]yoltage[]]or[]VTA2[]circuit.

OK:

Accelerator[pedal	Throttle[yalve[ppening position[expressed as[]vTA)	Voltage (VTA2)
Released	8[-]20[%	2.0[] [2 .9[] V
Depressed	64[]-[96[%	4.6[-[5 .1[] V

Check and replace engine ECU (See page IN-29).

NG

2 | Check[voltage[between[terminals[VC]and[E2[of[engine[ECU]connector.

PREPARATION:

- (a) Remove the regine room regine ECU hood and cover.
- (b) Turnthe ignition witch ON.

CHECK:

 $\label{lem:lemminals_VC} Measure[\voltage[\perminals]\voltage[\p$

connector.

OK:

Voltage: 4.5 1 5.5 V

Check \square and \square replace \square engine \square ECU \square (See \square page IN-29).

OK

3 | Check[voltage[between[terminals[VTA,[VTA2[and[E2[of[engine[ECU[connector.

PREPARATION:

- (a) Remove the engine from engine ECU hood and cover.
- (b) Turn the ignition switch ON.

CHECK:

OK:

	Voltage		
Accelerator pedal	VTA	VTA2	
Released	0.4[] -[].0[]V	2.0[] [] 2.9[] V	
Depressed	3.2[- [4.8[] V	4.6[-][\$.1[] V	

ок□

Check and replace engine ECU (See page IN-29).

NG

4 Check[throttle[position[sensor[See[page[FI-32]]].

NG□

Replace[throttle[position[sensor (See[page[Fl-36]).

OK

 $\label{lem:constraint} Check \cite{for pen and short in harness and connector between \cite{for pen and connector between \cite{for p$

When hot using hand-held tester

1 Check[voltage[between[terminals[VC]]and[E2[of[engine[ECU]]connector.

PREPARATION:

- $(a) \hbox{$\square$} \quad \hbox{Remove} \hbox{$[]$ he $\]$ engine $\]$ for $\]$ engine $\]$ ECU \hbox{$[]$ hood $\]$ and $\]$ cover.}$
- (b) ☐ Turn the ignition switch ON.

CHECK:

 $\label{lem:lemminals_VC} Measure \cite{Condense} where \cite{Condense} between \cite{Condense} erminals \cite{Condense} VC \cite{Condense} and \cite{Condense} erminals \cite{Condense} VC \cite{Condense} and \cite{Condense} erminals \cite{Condense} VC \cite{Condense} and \cite{Condense} erminals \cite{Condense} VC \cite{Condense} erminals \cite{Condense} erminals \cite{Condense} VC \cite{Condense} erminals \cite{Cond$

connector.

OK:

Voltage: 4.5 1 5.5 1 √ 5.5 1

Check and replace engine ECU (See page IN-29).

ок

2□

Check[voltage[between[terminals[VTA,[VTA2[and[E2[bf]engine[ECU]connector.

PREPARATION:

- (a) Remove the engine foom engine ECU hood and cover.
- (b) Turn the ignition switch ON.

CHECK:

OK:

	Voltage		
Accelerator pedal	VTA	VTA2	
Released	0.4 ~ 1.0 V	2.0 ~ 2.9 V	
Depressed	3.2 ~ 4.8 V	4.6 ~ 5.1 V	

OK

Check and replace engine ECU (See page N-29).

NG

3 Check[throttle[position[sensor[See[page[FI-32]].

NG□

$$\label{lem:lemost} \begin{split} & \textbf{Replace[hrottle[position[sensor (See[page[Fl-36]).]]]))} \end{split}$$

OK

 $\label{lem:constraint} Check \cite{forpen-and-short-in-harness-and-connector-between-engine-ECU-and-throttle-position-sensor-(VC, VTA, VTA2, E2 \cite{line}) \cite{line-short-in-harness-and-connector-between-engine-ECU-and-throttle-position-sensor-(VC, VTA, VTA2, E2 \cite{line-short-in-harness-and-connector-between-engine-ECU-and-throttle-position-sensor-(VC, VTA, VTA2, E2 \cite{line-short-in-harness-and-connector-between-engine-ECU-and-throttle-position-sensor-(VC, VTA, VTA2, E2 \cite{line-short-in-harness-and-connector-between-engine-engin$
